SUMMARY

Computer Science graduate with hands-on data engineering experience across SQL Server, Snowflake, and PySpark-based ETL pipelines, including enterprise exposure at HCLTech. Co-author of two published papers and a filed patent spanning cloud architecture and fraud detection. Actively building AWS and Databricks expertise to grow into a Data Engineer role focused on scalable, production-grade pipelines.

SKILLS

Languages: Python, SQL, PL/SQL, C, C++

Data Engineering: Snowflake, ETL/ELT, PySpark, Apache Spark, HDFS, Data Warehousing, Data Validation, Incremental Processing, JSON, CSV

Databases: Snowflake, SQL Server, Oracle, MySQL

Tools & Platforms: Git, GitHub, SnowSQL, SSMS, Jupyter Notebook

Libraries: Pandas, NumPy, Scikit-learn, PyTorch Geometric, NetworkX, Matplotlib

WORK EXPERIENCE

Academic Trainee — Data Engineering

Mar 2026 – Present

HCLTech · Transamerica Account

- Optimized and maintained SSIS packages in a production ETL pipeline, staging files from SharePoint to SQL Server and running pre-load validation against error lists for thousands of financial records daily and quarterly.
- Queried and monitored SQL Server databases and SSMS logs across 4 enterprise financial applications spanning dev, test, model, and production environments.
- Debugged a Python–Excel COM automation regression in a 12-step macro-driven CFT workflow, isolating failure points introduced by an Excel version upgrade.
- Building AWS foundational knowledge (EC2, S3, IAM, Glue) through ongoing enterprise training.

Data Analyst Intern

Jun 2024 – Nov 2024

Avabodh Foundation

- Built an automated Python ETL pipeline to process and clean 10,000+ records, cutting manual processing time by ~40%.
- Conducted EDA using Pandas and NumPy; built stakeholder dashboards in Matplotlib and Seaborn to surface actionable trends.
- Translated findings into outreach strategy recommendations, contributing to a ~15% improvement in campaign effectiveness.

PROJECTS

Snowflake Policy Eligibility Engine

Stack: Snowflake, SQL, JavaScript UDFs, SnowSQL, Streams, Tasks, JSON, CSV, VARIANT, MERGE, Stored Procedures

- Designed an end-to-end ETL pipeline on Snowflake using Medallion architecture (RAW → VALIDATED → CURATED) to automate insurance policy validation and eligibility determination at scale.
- Implemented incremental, idempotent ingestion via Streams and Tasks to merge structured (CSV) and semi-structured (JSON/VARIANT) data without full reloads.
- Built a rule-based eligibility engine using JavaScript UDFs and Stored Procedures, automating decisioning logic previously handled manually.
- Enforced least-privilege access through RBAC and dynamic data masking, with audit logging for full pipeline traceability.

Employee Attrition Prediction · Distributed ML

Stack: PySpark, Spark MLlib, Python, Scikit-learn, MCDM

- Built a distributed ML pipeline on PySpark and Spark MLlib to predict employee attrition from large-scale HR datasets.
- Applied an MCDM framework to combine ensemble model outputs into a single ranked decision signal, improving prediction robustness.
- Applied MCDM techniques using linear algebra for weighting criteria and optimization algorithms on 500K+ employee reviews, improving model performance by 12%.

FraudNet — Graph-Based Financial Fraud Detection

Stack: Python, PyTorch Geometric, NetworkX, Pandas, NumPy

- Engineered a heterogeneous graph data pipeline from raw transaction records to model entity relationships that tabular models miss.
- Built a GNN node-classification pipeline in PyTorch Geometric with graph construction and feature engineering to detect fraudulent patterns.
- Projected to reduce fraud transaction losses by up to 30%, while minimizing false positives in high-volume datasets.

EDUCATION

B.Tech, Computer Science and Engineering

2022 - 2026

Symbiosis Institute of Technology, Symbiosis International University

CGPA: 8.68 / 10 | Relevant Coursework: Database Systems, Big Data Analytics, Cloud Computing, Algorithms, OS, Computer Networks

CERTIFICATIONS & PUBLICATIONS

- Big Data Masters Program — Trendy Tech Technologies (Azure · Apache Spark · PySpark · HDFS).
- Certified System Administrator — ServiceNow.
